For the remainder of McNeil/JV products:

Glutens are naturally-occurring proteins found in grains such as wheat, rye, barley and oats, but are not found in corn. The primary source of starch in our formulations is corn. Relatively small amounts of other materials used in our formulations may contain starch from other sources (e.g. potato, rice).

We are not aware of published reports associating the use of our products with a worsening of symptoms in patients with celiac disease.
